

Hi Peter,

I've just had a discussion with a ratepayer who is concerned about the demolition of the building on Anstey Park. They want an assurance that care will be taken that any asbestos in the building is identified, treated and disposed of properly. A one line reply to this email will probably do nicely if you have the time.

You would think that this shouldn't even be an issue, but they are concerned that it would be done (in their words) "by a prison work crew and a front end loader".

I think what could be happening here is that people remember years ago a Shire worker was asked to remove some asbestos and he wasn't given the correct protection. Worksafe got involved and the (disgruntled) Shire worker ended up hiring one of the top industrial relations and compensation lawyers in the state and there was a bit of a hoo hah over it.

regards

Adam
